

## **Wow and Wonder Better World Day Challenge**

Friday, May 1<sup>st</sup> is Better World Day. Though our plans may have been postponed for Better World Day, nothing can halt our creativity for the betterment of our world. Therefore, your challenge this week is to utilize things around the house, including recycled materials, to construct an invention or prototype that could help to create a better world in our school, community, or planet. You can utilize the design thinking process with your family to get your creative juices flowing and then construct your invention. Feel free to revise as you test your prototype and receive feedback so you can create the highest-quality product. As always, if you'd like to share your invention, we'd love to see it! Please include a picture or video as well as your explanation of how your invention will make the world a better place. I can't wait to see what you come up with!
